

MEDICAL REPORT

SECTION 1: PATIENT'S PARTICULARS

Patient name: Tania Richardson

Patient age: 55 years

SECTION 2: DOCTOR'S PARTICULARS

Doctor name: Dr. Jessica White

Hospital / Clinic name and address: 1 Blackacre Hospital, Singapore 01010101

Doctor-patient relationship:
I have been the doctor in charge of Ms. Tania Richardson since January 2017. I have seen Ms. Richardson occasionally since then, on average once or twice a year. For purposes of this medical report, I re-examined Ms. Richardson on 12 November 2024.

SECTION 3: PATIENT'S MEDICAL INFORMATION

Patient's clinical history:
Ms. Richardson was accompanied by her son, Mr Tan Ah Beng, for the examination. Ms. Richardson is a 55 year old woman, who is divorced, and unemployed. Ms. Richardson is currently living with her son, Ah Beng, in Ah Beng's flat. Mr Tan Ah Beng informed me that Ms. Richardson used to work as a cleaner.

Ms. Richardson has a history of medical conditions. She has had hypertension and hyperlipidemia since 1990 and suffered several strokes in 2005. She subsequently developed heart problems (cardiomyopathy), cardiac failure and chronic renal disease and was treated in ABC Hospital. She was last admitted to the ABC Hospital on 1 April 2010 till 15 April 2010, during which she was diagnosed to have suffered from a stroke. This was confirmed by CT and MRI brain scans.

Thereafter, she was transferred to XYZ Hospital for stroke rehabilitation on 15 April 2010. After that, Ms. Richardson was referred to Blackacre Hospital for follow-up treatment from in November 2010. The clinical impression was that he was manifesting behavioural and psychological symptoms secondary to Dementia.
